Education

Georgia State University, *Bachelor of Science, Economics and Mathematics* May 2028

- GPA: 4.0 (President's List)
- **Relevant Coursework:** Econometrics; Probability & Mathematical Statistics*; Linear Algebra; Real Analysis*; Python Programming; Microeconomics Analysis*; Macroeconomics (* denotes graduate-level coursework)
- **Awards:** Presidential Scholarship (Full ride, merit); Zeinah Danielle Aouani Scholarship for Economics Research

Relevant Experience

Research Scholar, University of Pennsylvania (Wharton) – Philadelphia, PA May 2026 – Aug 2026

- Constructed and validated an experimental health-services purchasing power parity index for 26 countries by integrating OECD expenditure and utilization data, computing bilateral Fisher and EKS multilateral indices, and benchmarking results against published health price-level measures.
- Applied causal inference methods, including difference-in-differences models in Python and Stata, to evaluate how payment policy changes affect provider behavior and healthcare utilization and translate research questions into reproducible analytical workflows.
- Screened and synthesized academic literature for a scoping review on mental models and health behavior, contributing to evidence extraction, manuscript development, and presentation of research findings.

Research Assistant, Department of Economics, GSU – Atlanta, GA Aug 2025 – May 2026

- Researched U.S. free trade agreements, foreign aid, and cross-border capital flows using country-year panel data from the World Bank, OECD, FRED, and BEA.
- Extracted, cleaned, merged, and validated macroeconomic and financial data across 46 countries to construct event-time panels, then estimated regression and event-study models in R and Stata to evaluate policy shocks, trade exposure, and long-run growth outcomes.
- Produced data visualizations and concise research summaries comparing pre- and post-policy trends across countries and industries and presented findings to faculty.

Chief Economist, Portfolio Management Group (Student-Managed Fund) – Atlanta, GA Feb 2026 – Present

- Analyze macroeconomic indicators, sector trends, and market conditions to identify key risks and opportunities and inform asset allocation and portfolio strategy for a \$1.6M student-managed fund.
- Built a Python-based market-regime analysis pipeline using principal component analysis and K-means clustering, translating quantitative findings into portfolio recommendations presented to the investment team.

Leadership

President, Economics Club @ GSU – Atlanta, GA May 2026 – Present

- Lead programming, partnerships, and career initiatives for 245+ members interested in economics, finance, consulting, and policy.
- Developed an AI-powered internship database application in Python to help members identify, filter, and track opportunities across consulting, finance, economics, and research.

Technical Skills

Programming/Data: R, Stata, Python, SQL, Excel, Git/GitHub, Jupyter Notebook

Quantitative Methods: Regression analysis, causal inference, panel data, event studies, hypothesis testing, time-series analysis, data cleaning and wrangling

Research/Analysis: Literature review, research synthesis, data visualization, financial modeling, economic analysis

Languages: English (fluent), Nepali (native)
